

SOFTWARE **BACKUP SOLUTIONS**

PG 1 OF 2

Our comprehensive portfolio of stand-alone software products are designed to simplify the functionality of your IBM Tivoli Storage Manager installation. STORServer's software products include:

STORServer Console (SSC) – Daily Operations Manager for TSM

This easy-to-use, intuitive graphical user interface (GUI) to TSM provides a highly disaster-tolerant environment for your valuable data while simplifying administration of the backup solution.

STORServer Virtual Machine Backup – LAN-free Backup of Virtual Machines on ESX Servers

This comprehensive solution improves manageability of backups and reduces costs by centralizing the backup of virtual machines on VMware ESX servers to your TSM server. And, it eliminates the need for individual backup clients.

STORServer Reporter for TSM – Performance Analysis Tool

STORServer Reporter for TSM keeps an eye on your backup environment when you can't. The Reporter software product provides live data gathering, one button analysis and reporting and trending of your STORServer Backup Appliance or TSM backup servers and clients.

STORServer software solutions are designed by experts in backup engineering. These superior solutions ensure customers enjoy the benefit of simplified management of backup processes in a variety of environments.

SOFTWARE **BACKUP SOLUTIONS**

PG 2 OF 2

STORServer Archive Backup Client for OpenVMS – Robust Backup for OpenVMS Systems

This software allows you to include OpenVMS servers in your heterogeneous TSM backup solution. Backup, archive, restore, query and manage are services provided for OpenVMS files stored on TSM servers.

STORServer Data Protection – Hot Backup for Oracle and Oracle Rdb

This backup software solution allows you to minimize system and application downtime, increase administrator productivity and provide superior backup performance for your business critical Oracle and Oracle Rdb databases.
